

DSRAZOR Solution: Exchange Management

Managing and Documenting your Exchange Installations is important. DSRAZOR for Windows includes several powerful features to help you manage your Exchange. Features include:

- Adding Exchange Mailbox to Existing User Accounts
- Adding Exchange Mailbox to User Accounts during Import¹
- Deleting Exchange Mailbox from selected User Accounts
- Smart Delete of User Account, Home Directory Structure and Exchange Mailbox
- Quick Search to find User Accounts with or without Exchange Mailbox
- Document Exchange Mailbox GUIDs
- Document Exchange Storage Group and Mailbox Store File Paths (.edb, .stm, transaction log and system path including Log File Prefix)
- Document Exchange Server Versions

Sample Exchange Server Report:

The screenshot shows the DSRAZOR interface for listing Exchange servers. The domain is DSREXCHANGE2K. The selected server is DSRW2K Mail Org/First Administrative Group/DSR-0007. The version of Exchange Server installed is Exchange 2000 SP3 August 2002 [Version 6.0 (Build 6249.4; Service Pack 3)].

Storage Groups for selected Exchange Server	Log File Prefix	Transaction Log Location	System Path Location
First Storage Group	E00	D:\Program Files\Exchsrvr\...	D:\Program Files\Exchsrvr\...
Second Storage Group	E01	D:\Program Files\Exchsrvr\...	D:\Program Files\Exchsrvr\...

Mailbox Stores for selected Domain, DNS ...	Server	.edb Path	.stm Path	#Members	Organizati...
Chicago	DSR-0007	D:\Program Files...	D:\Program Files...	3	DSRW2K
Engineers	DSR-0007	D:\Program Files...	D:\Program Files...	2	DSRW2K
Mailbox Store (DSR-0007)	DSR-0007	D:\Program Files...	D:\Program Files...	6	DSRW2K
Managers	DSR-0007	D:\Program Files...	D:\Program Files...	2	DSRW2K
