

DSRAZOR Solution: User self-updates

Most Network Administrators have limited time and resources. Delegating the modification and updating of user directory data is easily accomplished with DSRAZOR. Your users can maintain their own data within Active Directory and eDirectory, saving you time and money.

The following is a sample applet created with DSRAZOR for Active Directory users:

Personal Information Change Form

Current Logon: CN=Administrator,CN=Users,DC=acme,DC=visualclick,DC=local

Modify values as required and click the "Apply" button to update. Click "Close" when finished.

First Name: Joseph	Home Phone: (312) 000 1212
Initial: R.	(312) 000 1212
Last Name: Pirelli	Pager: (312) PAG-ER01
Employee ID: 990077	(312) PAG-ER01
Department: Server Ops	Mobile Phone: (312) MOB-ILE1
Office Phone: (312) 555 1212	(312) MOB-ILE1
E-Mail: jpirelli@bigcompany.com	Vehicle License: 998899AX
	998899AX

All personal contact information must be true and correct in accordance with corporate policy. Entering of false or misleading information can be used as grounds for disciplinary action.

The following is a sample applet created with DSRAZOR for eDirectory users:

Managing Your Profile:

Your NDS Account Name: SamTurner.it.services.acme

Your Profile:

Job Title: Manager of IT

Department: IT Services

Phone Number: x5752

Fax Number: none

Email Address: sturner@acme.net

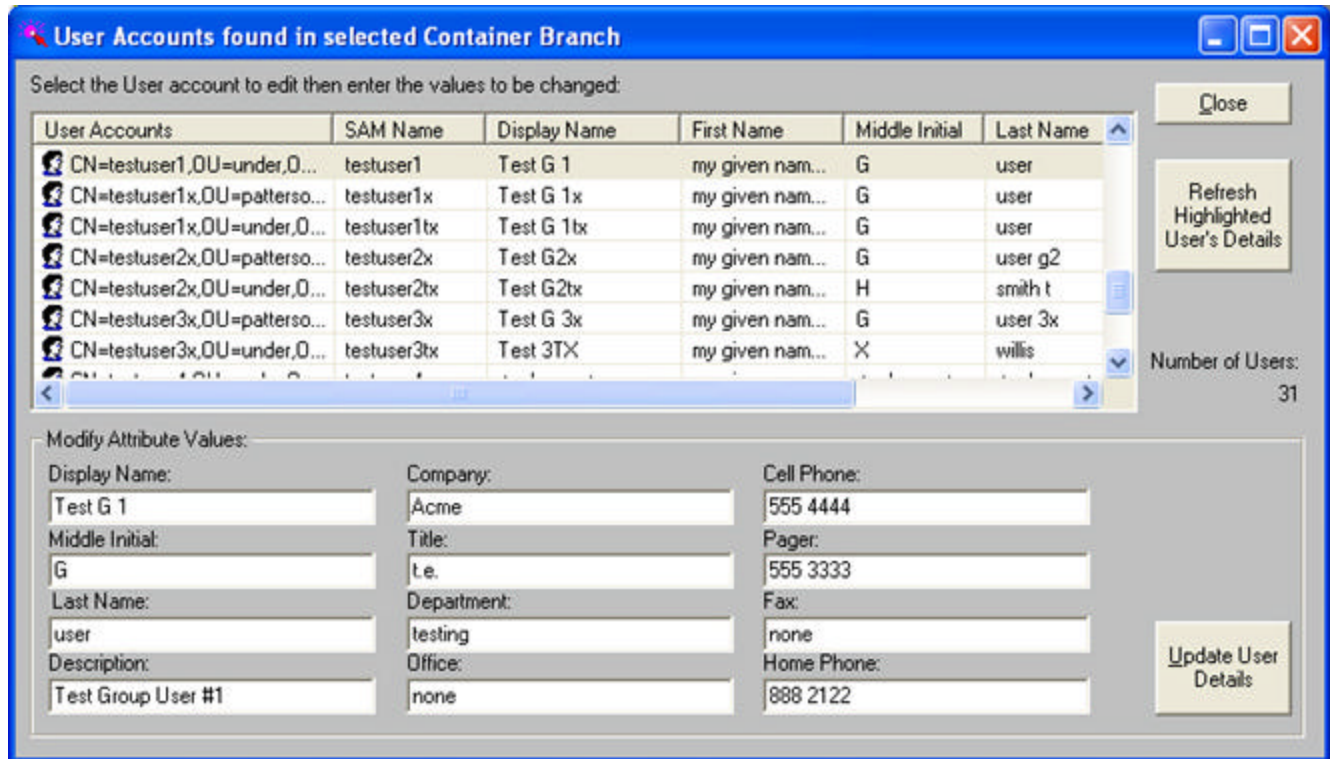

No Changes

Save All Changes

Your customized self-update applet can be saved as a stand-alone executable that can be distributed to your users. Now your users can quickly and easily maintain their own directory data.

If you prefer, these applets can be modified so your Human Resource department can maintain user account directory data.

The following is a sample applet created with DSRAZOR for Active Directory Human Resources staff:

Free precious time for higher priority duties when you delegate directory data management with DSRAZOR. DSRAZOR enables you to delegate modification and updating of user directory data to department managers, the human resources department or to the users themselves.

Get the applet you need when you use DSRAZOR's flexible and powerful visual scripting engine.

Sample ROI worksheet:

Description	Example	Your Environment
Average Number of changes to user data each year	5	
Average Time required for each change using Native Tools	3 minutes	
Average Time per user account per year	15 minutes	
Number of User Accounts	1000	
Total Time Per Year	250 hours	
Typical Network Administrator Salary	\$30/hour	
Total Yearly Cost to maintain user directory data	\$7,500 ⁰⁰	
Average Initial Price of DSRAZOR for 1000 users	\$5,500 ⁰⁰	
Time to Payback	< 9 months	
<i>Save even more money and time with DSRAZOR's other features</i>
