

KEY FEATURES

FLEXIBLE LICENSING

DSRAZOR allows for autonomy in serving the needs of individual workgroups and departments within your enterprise. Licensed per Domain, Active Directory Container or per DNS Domain Root allowing you to implement DSRAZOR per your requirements.

REDUCE ERRORS

DSRAZOR's patented designer interface* ensures your applets exactly match the task-at-hand and enable you to deliver a solution where mistakes are reduced and all actions are audited.

PROVISION + DEPROVISION

DSRAZOR provides comprehensive Active Directory and Windows File System User Account automated provision and deprovisioning solutions. Easily combine with your existing HR tools and stay in control of your Active Directory and Microsoft® Exchange Accounts.

AUDIT + DOCUMENT

DSRAZOR will thoroughly audit and document your vital Active Directory and Windows File System security data. You can filter on almost any attribute or combination of attributes. For instance, you might need to find all accounts whose password settings do not match your enterprise standard. Or to find all objects that have Administrative privileges. Reports can include a high level of detail including all user accounts and effective file system access to the folders you choose.

EXCHANGE REPORTING

DSRAZOR includes support for all versions of Exchange. Document mailbox statistics. Add, Enable and Delete Exchange Accounts interactively or in bulk.

ZERO PRIVILEGE®

DSRAZOR's Zero Privilege® Help Desk Delegation technology details:

- Does not use or rely on Active Directory Delegation
- Uses a separate server-based service with full security options
- Create Active Directory Accounts
- Change Passwords
- Change Active Directory Details
- Create Exchange Accounts
- Create Home Directories
- Full Audit Trail

for Windows

Visual Click's DSRAZOR for Windows uniquely solves challenging Active Directory, Windows File System and Exchange issues.

Specifically designed to:

- Reduce Risk
- Expedite Discovery and Reporting
- Find and Correct Security Compliance Issues

Additionally featuring:

- Zero Privilege® Helpdesk Delegation
- Patented Drag and Drop Customizable Interfaces*
- Security Assessments and Correction Reports

Security Reporting Tools:

- Document NTFS Security Settings
- Remove unwanted NTFS Security Permissions
- Report NTFS Permissions by User
- Report NTFS Permissions by Share
- Design Departmental NTFS Permissions Reports
- Weekly Manager Reports of User and Group Permissions

Use to interactively manage multiple networks from a single, efficient and time-saving interface. Large scale activities can be easily offloaded to stand-alone tasks.
Enable your administrators to operate more efficiently, doing more with less.

* U.S. Patent No. 6,438,742

DSRAZOR for Windows from Visual Click Software is your answer to Active Directory, Windows and Exchange management, no scripting required! When you use DSRAZOR, you will be able to precisely interact with your Active Directory environment, Windows File Systems and Exchange Accounts. Discover security weaknesses, audit accounts, document objects, manage attributes and delegate duties.

United Hospital System says: *"One of the biggest advantages of DSRAZOR applets is that they enable Help Desk administrators to do their job without requiring full directory rights."*

"With all of the benefits we have experienced with DSRAZOR and its Zero Privilege Helpdesk, perhaps equally as valuable is the support we have received from Visual Click."

"DSRAZOR gave us what we needed and allowed us to stay within budget."

Sydney Water says: *"Combining the capabilities of Tivoli and DSRAZOR was a tactical solution to our efficiency problem, now, the provisioning process takes less than five minutes per user, freeing up our staff to focus on more business-critical tasks."*

"We needed a tool that would complement well with Tivoli and reduce this effort so we could run provisions more quickly."

"If I identify a function that is best performed by another group, I can use Zero Privilege to allow them to do it without compromising security, it gives us another level of control over Active Directory."

About Visual Click Software, Inc:

Envisioned in 1996 and incorporated in 1999, Visual Click is the leader and pioneer in visually customizable computer network security access management and reporting applications.

Network Security Access Management: Our patented Visual Designer Technology allows for customer-specific applications to be developed in minutes rather than days, weeks or months. This powerful technology creates a new paradigm in network security access management. Previous technology either required use of overly large and complex 'consoles' that performed slowly and required product-specific training or required customized programming.

Our technology allows the customer to create exactly what they need to control their network security access management without burdening the Administrator or requiring custom computer programming costs.

Network Security Reporting: Our patented Visual Designer Technology allows for customer-defined reports to be developed in minutes with very little training. This powerful technology allows the network administrator to focus on the important matters of securing their network. With minor customizations, each Network Security Report can simultaneously be used for Network Security Access Management. Each Network Security Report can be used to change the Network Security issues it uncovers. This important technology solves two problems at the same time, namely, reporting about Network Security non-compliance and enforcing corporate Network Security policy.

Customer Benefits: Exceeding customer expectations is our number one goal. We know time is a resource that most IT professionals have in short supply. For this reason, our software is designed to reduce errors and minimize training costs, thereby freeing up valuable time to focus on more mission-critical tasks.
